Price Management 2026/2027 · Pricing Project

Case Book

30 cases – one for each student

Each student works on **one case**, assigned at random on Thursday, 1 October 2026 (list on Loomen). Every case is a fictitious company with a digital or green product or service. The case sheet gives the facts; your task – the pricing strategy, the website, the report and the presentation – is described in the **Project Brief**.

Use the facts on your sheet. Where a fact is missing, make a reasonable assumption and state it in your report. The last line of each sheet names the lecture handouts to read for the case.

The cases

No.	Company	Product or service	Type
01	Ridgeway Maps	Offline hiking and trail-running maps	B2C · digital
02	PawPal Vet	Video consultations with vets for pet owners	B2C · digital
03	Mindmoor	Sleep and mental-health app with licensed therapists	B2C · digital
04	CourtSide	Digital season and match tickets of a handball club	B2C · digital
05	Novčić Pay	Account and debit card for young people	B2C · digital
06	Tidewise	App for booking a sailing boat with a skipper	B2C · digital
07	ReWear Split	Clothing rental subscription (circular fashion)	B2C · green
08	FixIt Phone	Phone repairs and refurbished phones with a 2-year warranty	B2C · green
09	CupCycle	Reusable coffee cups with a deposit in a city network of cafés	B2C · green
10	E-Bici Zadar	Shared electric bikes in the city	B2C · green
11	Farm2Door	Organic vegetable boxes from local farms (subscription)	B2C · green
12	Second Life Furniture	Marketplace for used furniture with transport and restoration	B2C · green
13	Sezonar	Shift planning for seasonal staff in hotels and restaurants	B2B · digital
14	LedgerLite	Bookkeeping and e-invoicing for micro-businesses	B2B · digital
15	ShieldDesk	Round-the-clock cyber-security monitoring for small and medium-sized firms	B2B · digital
16	RouteSense	Route optimisation for delivery fleets	B2B · digital
17	ClinicFlow	Online booking and appointment reminders for private clinics	B2B · digital
18	Klijentnik CRM	CRM for small marketing, design and PR agencies	B2B · digital
19	Humus Coast	Food-waste collection and composting for hotels and restaurants	B2B · green
20	PalletLoop	Pooled reusable pallets for food producers	B2B · green
21	CargoVolt	Delivery by electric cargo bikes for shops in the city centre	B2B · green
22	RoofGreen	Green roofs for commercial buildings (installation and maintenance)	B2B · green
23	ReKrug IT	Refurbished laptops as a service, per user per month	B2B · green

No.	Company	Product or service	Type
24	AgriSense	Soil-moisture sensors and irrigation advice for vineyards	B2B · green
25	VoltPoint Distribution	Home chargers for electric cars, sold through installers	S/D · green
26	ReTile	Playground safety tiles from recycled rubber, exported through partners	S/D · green
27	Gazište Tyres	Retreaded truck tyres, sold to fleets through tyre-service shops	S/D · green
28	TableTap	White-label ordering app for restaurants, sold through resellers of cash-register systems	S/D · digital
29	Adria Lens	Licences for photos of Croatia, sold to publishers, portals and agencies	S/D · digital
30	GameKey Balkan	Activation keys for PC games, sold to shops and web shops in five countries	S/D · digital

Case 01 · B2C · digital

Ridgeway Maps – Offline hiking and trail-running maps

Fictitious company – all names and figures are invented for this course.

Ridgeway Maps is a start-up from Split. Its app shows every marked mountain trail in Croatia, Slovenia and Bosnia and Herzegovina on detailed topographic maps that also work without a mobile signal. Users plan and save routes, see mountain huts and water sources, get wildfire and storm alerts, and group leaders can follow their group live on the map. After a free test year the app has **16,000 active users**. From the next season it has to earn money.

Users and what they told us (survey of 900 active users)

Segment	Active users	How they use the app	What they told us
Occasional hikers and tourists	9,600	1–2 trips a year, usually in one region during a holiday (1.5 regions a year on average)	Offline maps for their holiday region are worth €3–6 to them. Share who would pay for one region: €2.99: 30% · €4.99: 24% · €6.99: 12%. Only 2–6% would pay €25–40 for a year of all regions.
Regular hikers and trail runners	5,600	30+ trips a year in all regions; plan routes, export GPX	48% pay for AlpMap Premium today. Share who would pay for a year of all regions: €24.99: 70% · €34.99: 58% · €39.99: 52% · €44.99: 38% · €49.99: 22%.
Club and group leaders	800	Lead groups of up to 15 people, 40+ trips a year	Share who would pay for a year of all regions with group tracking: €69: 80% · €89: 65% · €109: 40%. Those who do not buy group tracking would buy a year of all regions (95%).

Value to regular hikers

- Complete coverage of marked Croatian trails (AlpMap shows 64% of them) is worth about **€10 a year** to them; hut information and fire and storm alerts about **€6 a year**.
- 35% of them also hike abroad and miss worldwide maps – on average a loss of about **€5 a year** per regular hiker.

Costs

- App-store and payment fee: **15%** of the price. Map-data licence: €1.00 per user and year with access to all regions; €0.20 per single region.
- Servers: €0.60 per user and year with access to all regions; €0.10 per single region; €0.20 per free user; group tracking €4.00 per group leader and year.
- Fixed costs (team, marketing, fixed part of the licence): **€140,000** a year.

Competitors and alternatives

- **AlpMap** (international): basic online maps free; **Premium €34.99 a year** – offline maps of the whole world, 3D view; no hut information.
- Paper map of one region: €12. **GroupTrack** (group tracking for guides): €79 a year. Mountaineering association website: free list of trails, no maps.

Constraints

- Location sharing and SOS must stay **free for everyone** (partnership with the mountain rescue service).
- Payments go through the app stores. Prices in this case are final consumer prices – ignore VAT.

Read for this case: lecture handouts Part 03, Part 04, Part 07 and Part 10 (Loomen). **Your task** is described in the Project Brief.

Case 02 · B2C · digital

PawPal Vet – Video consultations with vets for pet owners

Fictitious company – all names and figures are invented for this course.

PawPal Vet d.o.o. from Zagreb runs an app in which pet owners talk to a licensed vet by video within 15 minutes, day and night. The vet looks at the pet, answers questions, says whether it must go to a clinic and sends notes to the owner's own vet; medicines cannot be prescribed by video. In the pilot year every consultation cost **€25**, day or night. **16,500 owners** have registered. From 2027 PawPal has to earn money and must set its prices.

Registered owners and what they told us (pilot data and a survey of 1,100 owners)

Group	Owners	Questions for a vet	What they told us
Owners of one healthy adult pet	12,000	1.5 a year; 40% of them in the evening, at night or at weekends	They would not pay any monthly fee.
Owners of puppies, kittens, old or chronically ill pets	4,000	8 a year; 40% in the evening, at night or at weekends	Share who would pay a monthly fee to get every consultation at about half price: €4.99: 70% · €7.99: 55% · €9.99: 20%. Share who would pay for unlimited consultations: €14.99 a month: 60% · €19.99: 40%.
Breeders and homes with 3 or more pets	500	16 a year; 30% in the evening, at night or at weekends	Monthly fee for half-price consultations: €4.99: 95% · €7.99: 90% · €9.99: 60%. Unlimited consultations: €14.99 a month: 95% · €19.99: 90%.

How owners book (pilot and survey, all groups)

- Share of their questions that owners book as a video consultation, by price – **weekdays 8–19:** €12: 90% · €15: 80% · €19: 60% · €25: 50% · €29: 40% · €39: 20%.
- **Evenings, nights and weekends:** €15: 95% · €25: 90% · €29: 85% · €35: 80% · €49: 60% · €69: 20%.
- In a test, owners with unlimited consultations asked **25% more** questions.

Value to owners

- Own vet (open weekdays 8–19): **€40** for an examination, plus a trip and waiting that owners value at about **€15**.
- In the evening, at night and at weekends only the emergency clinic is open: **€95**, plus about **€20** for the trip.
- In the pilot the vet sent **35%** of callers to a clinic anyway; the others solved the problem at home.

Costs

- Vets are paid per consultation: **€10** on weekdays 8–19, **€18** in the evening, at night and at weekends. Card payment fee: 2% of every payment.
- Health record, reminders and billing for a monthly plan: €0.40 per member a month. Fixed costs (platform, marketing, a standby vet every night and weekend): **€600,000** a year.

Competitors and constraints

- **VetText** (Croatian website): written answers from a vet nurse within 24 hours, €9.99 per question, weekdays only. Pet forums and social-media groups: free, no vet.
- Monthly plans must be cancellable at the end of any month. Prices are final consumer prices – ignore VAT.

Read for this case: lecture handouts Part 03, Part 04 and Part 05 (Loomen). **Your task** is described in the Project Brief.

Case 03 · B2C · digital

Mindmoor – Sleep and mental-health app with licensed therapists

Fictitious company – all names and figures are invented for this course.

Mindmoor d.o.o. from Rijeka sells two monthly plans in its app. **Sleep** (€9.99 a month) is a 6-week programme for better sleep with a sleep diary and audio exercises. **Care** (€89 a month) adds a licensed psychotherapist: chat on weekdays and two 45-minute video sessions a month. Both plans renew every month until cancelled; 2,600 people pay today. In 2027 a national campaign will bring about **60,000 new visitors** to the app. Mindmoor must decide on what terms newcomers can start.

Groups and what they told us (survey of 1,400 people who downloaded the app but did not pay)

Group	Number	What they want	What they told us
Poor sleepers	42,000 visitors in 2027	The Sleep plan; most try several apps	They cannot judge a programme before using it. 44% were once charged after a free trial they had forgotten to cancel; many "will not give an app their card again".
People with stress, anxiety or low mood	18,000 visitors in 2027	The Care plan; to talk to a professional	Main fear: paying for a therapist they do not get on with. 70% say a much lower first price would make them "wonder what is wrong with it".
Current users	2,600 (Sleep 2,000, Care 600)	Monthly plans	In 2026: 140 complaints about unexpected charges, 60 chargebacks through banks; app rating down from 4.6 to 4.2.

Tests in spring 2026: Sleep (per 1,000 visitors)

- No offer: 30 buy and pay on average 5.0 months in the first year. 50% off the first 3 months: 55 buy, 5.0 months (3 of them at half price, €4.99).
- 7 free days, then charged automatically: 200 start, 90 charged, 36 ask for their money back, the other 54 pay 3.5 months. 7 free days without a card: 160 start, 40 buy, 7.0 months.

Tests in spring 2026: Care (per 1,000 visitors)

- No offer: 12 buy, 6.0 months. 50% off the first 3 months: 25 buy, 4.0 months (3 at half price).
- 7 free days with one video session, then charged automatically: 60 start, 24 charged, 6 ask for their money back, 18 pay 4.5 months. Full price, money back on request within 30 days: 20 buy, 3 ask for it, 17 pay 7.5 months.

Costs and value

- Sleep: app-store fee 15% of the price; content and servers €0.40 per paying month; €0.20 per free-trial user.
- Care: card fee 2%; therapists are paid €25 per video session and €8 per member a month for chat. A free week costs €27. Each refund costs €5 to handle. Campaign 2027: **€120,000**.
- A private psychotherapist costs **€60** a session, with a waiting list of about 6 weeks.

Competitors and constraints

- **Slumbra** (international sleep app, no therapists): €7.99 a month; 7 free days, then charged automatically. Public-health psychologists: free with a doctor's referral, several months' wait.
- EU consumer law: directly before payment the app must show clearly the price, that the plan renews and how to cancel; boxes for extra payments must not be pre-ticked. Prices include VAT – ignore VAT.

Read for this case: lecture handouts Part 03, Part 05, Part 06 and Part 11 (Loomen). **Your task** is described in the Project Brief.

Case 04 · B2C · digital

CourtSide – Digital season and match tickets of a handball club

Fictitious company – all names and figures are invented for this course.

RK Galeb from Zadar plays in the first Croatian handball league. Its home hall has **3,000 seats**. Next season the club plays **15 home matches**: 3 top matches (two derbies and a European cup match) and 12 regular league matches. Today every ticket costs **€10** and a season ticket for all home matches **€100**. From next season all tickets are sold only in the club's new app, **CourtSide**, which checks student IDs; tickets can be passed on only in the app. The club must set its ticket prices.

Fans and what they told us (ticket data of this season and a survey of 1,300 fans)

Group	Today	How they buy	What they told us (per regular match)
Season-ticket holders	800	Come to every match, top matches included	Share who would renew: €100: 95% · €120: 90% · €150: 60%.
Adult fans, single tickets	800 per regular match	Half buy 2 or more days before the match, half on match day	Tickets if bought 2+ days before: €8: 550 · €10: 400 · €12: 280. On match day: €10: 400 · €12: 380 · €15: 260 · €20: 150.
Students	150 per regular match	Have a student ID; come with friends	Tickets: €4: 450 · €6: 350 · €8: 220 · €10: 150 · €12: 100.
Families (2 adults and children under 14; 4 seats on average)	40 per regular match (4 × €10)	Plan ahead	Families, by the price for the whole family: €20: 100 · €25: 80 · €30: 60 · €40: 40 · €48: 30.

Top matches and fans' view of prices

- Top matches: today all seats are gone within 2 hours, and tickets are resold on social media for about **€40**. Requests for single tickets per top match (all groups): €10: 6,000 · €20: 3,800 · €30: 2,300 · €40: 1,900 · €50: 1,400.
- If a ticket for any match cost more than **€30**, 30% of season-ticket holders would not renew, and 25% of adult single-ticket fans would come to half as many regular matches.
- 62% of fans call it unfair when the price of the same seat changes without warning.

Costs

- Per spectator: €0.60 app and payment fee + €0.40 security and cleaning.
- Hall rent **€2,500** per match; ticket office, stewards and app licence **€60,000** a season.

Alternatives and constraints

- All matches are shown free on public TV. A cinema ticket in Zadar costs about €7; the city's basketball club charges €6.
- The hall's safety limit is 3,000 people, children included. Every season-ticket holder has a seat at every match. Prices include VAT – ignore VAT.

Read for this case: lecture handouts Part 04, Part 07 and Part 11 (Loomen). **Your task** is described in the Project Brief.

Case 05 · B2C · digital

Novčić Pay – Account and debit card for young people

Fictitious company – all names and figures are invented for this course.

Novčić Pay d.o.o. from Zagreb is a licensed e-money company. Its app gives young people aged 18–26 a euro account with a debit card, instant transfers to friends and savings goals. After a free launch year it has **40,000 customers**, and nobody has paid anything yet. From 2027 the account has to pay for itself, so the company must set its price list.

Customers and what they told us (account data and a survey of 2,000 customers)

Group	Customers	A typical month	What they told us
Students (18–22)	24,000	Card payments €250, of which €25 in other currencies; 1 cash withdrawal	Share who would pay a monthly fee for free cash withdrawals, shared accounts and virtual cards: €2.99: 15% · €3.99: 8% · €4.99: 4%.
Young employees (23–26)	12,000	Card payments €900, of which €50 in other currencies; 2 cash withdrawals	The same features: €2.99: 50% · €3.99: 40% · €4.99: 20%.
Travellers (study or seasonal work abroad, frequent trips)	4,000	Card payments €800, of which €400 in other currencies; 2 cash withdrawals abroad	Share who would pay a monthly fee for no currency fee, free withdrawals worldwide and travel insurance: €5.99: 80% · €6.99: 70% · €8.99: 30%.

How customers react to fees (survey)

- If the account itself had a monthly fee, 55% of the students, 25% of the employees and 10% of the travellers would leave.
- If there were no monthly fee but each cash withdrawal cost €1.50 and payments in other currencies 1.5% above the ECB rate, 5% of the students, 3% of the employees and 70% of the travellers who pay these fees would leave.

Income and costs

- Novčić earns **0.2%** of all card payments from the merchants' banks (the EU limit for debit cards).
- Per customer a month: €0.60 (card, processing, checks, support). Each cash withdrawal costs Novčić €1.00; payments in other currencies 0.3% of the amount; travel insurance €0.50 per insured customer a month.
- Fixed costs (licence, compliance, IT, staff): **€700,000** a year.

Competitors

- Banks: account package €3–5 a month; cash withdrawals €1–2; payments in other currencies 2.5%.
- **Fluxa** (international app): no monthly fee; other currencies 1.0%; withdrawals abroad €2 each; Premium €9.99 a month without a currency fee. Travel insurance bought separately: about €4 a month.

EU rules

- Before opening an account, customers get a fee information document listing every fee under standard names; once a year, a statement of all fees paid.
- A currency conversion fee on a card payment is shown as a percentage above the ECB reference rate before the payment. An offer may be called "free" only if the customer pays nothing. Account fees are exempt from VAT.

Read for this case: lecture handouts Part 03, Part 04, Part 05 and Part 07 (Loomen). **Your task** is described in the Project Brief.

Case 06 · B2C · digital

Tidewise – App for booking a sailing boat with a skipper

Fictitious company – all names and figures are invented for this course.

Tidewise d.o.o. from Split runs an app for booking a sailing boat with a skipper for a day trip to the islands (9:00–17:00, up to 8 guests). It has **10 boats** and sails from April to October, one trip per boat a day. Today every trip costs **€650 per boat**, in every season and on every day – a price set in 2024 as the full cost of a boat-day (fixed costs spread over an expected 1,400 boat-days, plus the costs of a trip) plus a 30% mark-up. For 2027 Tidewise must set new prices and booking terms.

Guests and what they told us (booking data 2026 and a survey of 900 guests)

Group	How they book	Boats requested per day (June or September, Sunday–Friday)	Other facts
Planners (families, groups of friends)	From home, 30 or more days ahead	€350: 10 · €450: 8 · €550: 6 · €650: 4 · €750: 2 · €850: 1	Today 20% of their bookings are cancelled (free up to 24 hours before), mostly in the last week; only a quarter of these boats are rebooked.
Late bookers (already on holiday)	In the last 7 days before the trip; rarely cancel	€450: 5 · €550: 4 · €650: 3.5 · €750: 3 · €850: 2.3 · €950: 1.8 · €1,050: 1.3 · €1,150: 1	30% of them wait for same-day deals: skippers give 35% off at the marina when a boat is free. 90% of these would book at the normal price if there were no deals.
Guests on Saturdays	Most guests arrive or leave on Saturday	Half of the Sunday–Friday requests, at prices €100 lower	Both planners and late bookers.

Seasons 2027

- Low season (April, May, October): 92 days, 14 of them Saturdays; 0.6 times as many requests as in June and September, at prices €100 lower.
- Shoulder season (June, September): 60 days, 8 Saturdays. Peak (July, August): 62 days, 9 Saturdays; 1.5 times as many requests, at prices €200 higher.

A test with a deposit (autumn 2026)

- Guests paid 30% of the price at booking. It was kept if they cancelled less than 14 days before the trip and refunded in full if the skipper cancelled for bad weather.
- Cancellations fell from 20% to 6%; 5% of planners did not book.

Costs

- Per trip: skipper €130; fuel, cleaning and marina fees €70; app and payment fee 3% of the price.
- Fixed costs (boat leases, insurance, berths, app): **€420,000** a season.

Competitors and constraints

- Charter agencies: a sailing boat with a skipper for €700–1,100 a day in July and August. Shared speedboat tours €60 and group boat tours €45 per person.
- Prices include VAT – ignore VAT.

Read for this case: lecture handouts Part 04, Part 06 and Part 07 (Loomen). **Your task** is described in the Project Brief.

Case 07 · B2C · green

ReWear Split – Clothing rental subscription (circular fashion)

Fictitious company – all names and figures are invented for this course.

ReWear Split d.o.o. rents quality and designer clothing to women and men in the Split area. Members choose items online or in the showroom, wear them and send them back; ReWear cleans and repairs every garment before it goes out again. In a one-year pilot customers paid **€12 per item** for up to 14 days. From January ReWear will sell **monthly memberships** and has to decide what they include and what they cost.

Potential customers in the Split area (survey of 1,100 people who know ReWear, scaled to the area)

Segment	People	How they use rented clothes	What they told us
Occasion renters	2,500	Weddings, parties, job interviews. In the pilot 40% of them rented per item, 0.5 items a month on average.	Share who would pay for 2 items a month: €19: 30% · €24: 24% · €29: 13%. Only 3% would pay €39–55 for 5 items a month.
Wardrobe refreshers	1,500	Office and going out; want about 5 new pieces a month. In the pilot 30% rented per item, 2 items a month.	Share who would pay for 5 items a month: €39: 62% · €45: 52% · €49: 40% · €55: 22%.
Style enthusiasts	500	Swap every week, about 10 items a month. In the pilot 25% rented per item, 4 items a month.	Share who would pay for 10 items a month: €69: 64% · €79: 56% · €89: 28%. For 5 items a month (up to €55): 70%.

What customers value

- The average item in the collection costs **€120** new. Members wear each rented item about 3 times. A fast-fashion top or dress costs about **€20** and is worn about 8 times before it is thrown away (survey).
- 46% of people who have never rented clothes are not sure the clothes would fit or suit them. In the pilot 8% of first-time renters were unhappy with fit or style; 7 in 10 rented again within 3 months.

Costs

- Per item rented: cleaning €1.80 (laundry partner using EU Ecolabel detergents), delivery and pick-up by e-cargo bike €1.20, wear and repairs €1.50 (a garment costs ReWear €36 and is rented 24 times).
- Payments and customer service: €1.20 per member a month, €0.30 per single rental. Fixed costs (showroom, staff, stock financing, app): **€300,000** a year.

Competitors

- **Closetly** (Zagreb, courier delivery across Croatia): 4 items a month for **€39**, first month at half price; no repairs, no showroom.
- Fast-fashion chains: tops and dresses €15–30, frequent sales of 30–50%.

Constraints

- ReWear's records show that each garment is rented 24 times before it is retired. ReWear has no certified study of the CO_2 or water saved by renting.
- The marketing agency proposes the slogan "The eco-friendly wardrobe – climate neutral with every order", based on carbon offsets at €0.10 per order.
- Prices in this case are final consumer prices – ignore VAT.

Read for this case: lecture handouts Part 03, Part 04, Part 05 and Part 11 (Loomen). **Your task** is described in the Project Brief.

Case 08 · B2C · green

FixIt Phone – Phone repairs and refurbished phones with a 2-year warranty

Fictitious company – all names and figures are invented for this course.

FixIt Phone d.o.o. has three shops in Osijek and Vukovar. It repairs smartphones with original-quality parts and sells refurbished phones, all with a **2-year warranty**. Every price is calculated the same way: **(parts + working hours × €40) × 1.30**. The €40 an hour is FixIt's fixed costs divided by the 9,500 working hours it planned. In 2026 FixIt made a loss, and its technicians worked only 37% of the planned hours. The owner wants new prices for 2027.

Customers in 2026 (quote requests and enquiries; survey of 600 of them)

Job	Requests a year	Today	What they told us
Screen repair, premium phones (€900–1,300 new)	1,600	€169: 85% accept. Most of the others use the brand's mail-in service.	Share who would accept: €199: 82% · €229: 78% · €249: 72% · €269: 55%.
Screen repair, mid-range phones (€200–400 new)	3,000	€97.50: 39% accept; the others go to a kiosk or buy a new budget phone (€199).	Share who would accept: €69: 72% · €79: 64% · €89: 48%.
Refurbished flagships, 2 years old (€799 new)	2,400	€422.50: 50% want to buy, but FixIt had only 1,100 phones.	Share who would buy: €449: 47% · €499: 42% · €549: 28% · €599: 15%.

Value facts

- The brand's mail-in service repairs premium screens with original parts for **€229**; the phone is away for 10 days. Owners say a day without their own phone costs them about **€4**.
- Kiosks fit copy screens for €69 (mid-range) or €119 (premium) with a 3-month warranty; 1 in 5 copy screens fails within a year (repairs FixIt redoes).
- After 3 more years a refurbished flagship resells for about €60; the same model bought new today resells for about €200. Buyers deduct about €30 for the small marks on a refurbished phone.

Costs

- Parts: premium screen €100, mid-range screen €45. A used flagship costs €240 to buy plus €25 of parts. Working time: 0.75 h per screen, 1.5 h per phone.
- Wages, shops and overheads are fixed: **€380,000** a year. 4% of repairs and 6% of phones come back under warranty; a claim costs the part (repairs) or €120 (phones).

Competitors

- **ReCell** (online): refurbished flagships with visible marks, battery at least 80%, 12-month warranty, **€449**.
- Electronics chains: the same flagship new for €799; budget phones from €199.

Constraints

- FixIt can buy at most **1,100** suitable used flagships a year (trade-ins and buy-backs).
- FixIt has no measured data on the CO_2 or e-waste its repairs save. Green claims must be provable (EU rules).
- Prices in this case are final consumer prices – ignore VAT.

Read for this case: lecture handouts Part 01, Part 03 and Part 05 (Loomen). **Your task** is described in the Project Brief.

Case 09 · B2C · green

CupCycle – Reusable coffee cups with a deposit in a city network of cafés

Fictitious company – all names and figures are invented for this course.

CupCycle d.o.o. runs a network of reusable coffee cups in **60 cafés** in the centre of Zagreb. A customer takes a coffee to go in a CupCycle cup and drops the cup at any partner café or return box; CupCycle collects, washes and brings the cups back. In a six-month pilot borrowing was free – for the first three months without a deposit, then with a €2 deposit. CupCycle now has to decide what customers pay from 2027.

Coffee-to-go customers of the partner cafés (survey of 1,500 customers, scaled to all customers)

Segment	Customers	Coffees to go a month	Share who would use CupCycle for all of them
Daily commuters	6,000	22	Per cup €0.10: 40% · €0.15: 30% · €0.20: 18%. Monthly membership with unlimited cups: €1.99: 58% · €2.99: 48% · €3.99: 30%.
Regulars	15,000	8	Per cup €0.10: 36% · €0.15: 28% · €0.20: 15%. Membership €1.99: 14% · €2.99: 6% · €3.99: 3%.
Occasional	30,000	2	Per cup €0.10: 22% · €0.15: 16% · €0.20: 8%. Membership: 1% at any of these prices.

What customers told us

- The shares above assume a **€2 deposit** per cup, paid back in cash or to the app at any partner café.
- With no deposit but a **€2.60 charge** for a cup not returned within 5 days, a third fewer people in every segment would use CupCycle. If borrowing were free without a deposit: 65% · 50% · 35%.
- 71% say single-use cups bother them; only 9% carry their own cup.

Costs

- Washing and collection: **€0.10** per use. Cafés pay CupCycle **€0.08** per cup served (a single-use cup and lid costs them €0.12).
- A new cup costs **€2.60**. Payments: €0.25 per member a month. Fixed costs (washing site, van, staff, app): **€100,000** a year.
- Pilot: without a deposit 1 cup in 15 was never returned; with the €2 deposit, 1 in 60.

Environment

- A life-cycle study reviewed by an independent expert (ISO 14044, 2026): a single-use cup and lid cause **30 g CO_2** per coffee; a CupCycle cup causes 360 g to make and 10 g per use for washing and collection.
- The cups are made of polypropylene and recycled after 200 uses. Marketing drafts: "Zero-waste coffee" and "100% plastic-free".

Competitors and constraints

- Cafés outside the network sell their own reusable cup for €9. **SipBack** (Ljubljana) plans to enter Zagreb with a €1 deposit and no fee, paid for by a coffee chain.
- Prices in this case are final consumer prices – ignore VAT.

Read for this case: lecture handouts Part 03, Part 04, Part 05 and Part 11 (Loomen). **Your task** is described in the Project Brief.

Case 10 · B2C · green

E-Bici Zadar – Shared electric bikes in the city

Fictitious company – all names and figures are invented for this course.

E-Bici Zadar d.o.o. runs **150 shared electric bikes** at 30 stations in Zadar. Riders unlock a bike with the app and leave it at any station. Since the 2025 launch everyone has paid **€0.20 a minute**. In July and August the fleet is sold out between 10:00 and 16:00, while outside the summer most bikes stand idle for most of the day. The city licence runs for five more years. The owners want a new price list for 2027.

Riders (app data 2026 and a survey of 1,400 riders and residents)

Segment	Size	How they ride	What they told us
Tourists, July–August, 10:00–16:00	51,000 ride requests	30 min a ride. 42,000 rides served; 9,000 requests turned away (no bike free).	Share of requests kept at a price for a 30-minute ride: €7.00: 98% · €8.50: 90% · €10.00: 62%.
Commuters (residents)	2,000	Could ride to work: 30 rides a month, 10 min each. 4% ride today.	Share who would buy a monthly pass (unlimited rides up to 30 min): €19.99: 50% · €24.99: 40% · €29.99: 22%.
Students, October–June	4,000	16 rides a month, 10 min each. 5% ride today.	Share who would buy a monthly pass: €9.99: 45% · €12.99: 35% · €14.99: 22% · €19.99: 10%.
Other riders, all other times	60,000 rides a year	15 min a ride; residents and visitors.	Rides compared with today's €3.00 for 15 minutes: €2.50: +28% · €2.80: +20% · €3.25: −6%.

Alternatives

- City bus: single ticket €1.60; monthly pass €30, students €10; a bus every 20 minutes, not to all stations.
- Bike rental shops: e-bike €25 a day. **Zipp** e-scooters (in Zadar since 2026): €1 to unlock + €0.22 a minute, all year.

Costs

- Per ride: battery swap, rebalancing and payment **€0.30**; wear and electricity **€0.015** a minute.
- Fixed costs (leased bikes, stations, staff, city licence): **€420,000** a year.

Constraints

- In July–August, 10:00–16:00, the fleet can make at most **42,000** rides of 30 minutes.
- The university can confirm student status in the app (e-student ID).
- The licence requires all prices to be shown in the app and at every station. Prices in this case are final consumer prices – ignore VAT.

Read for this case: lecture handouts Part 03, Part 04 and Part 07 (Loomen). **Your task** is described in the Project Brief.

Case 11 · B2C · green

Farm2Door – Organic vegetable boxes from local farms (subscription)

Fictitious company – all names and figures are invented for this course.

Farm2Door d.o.o. delivers weekly boxes of certified organic vegetables from 12 family farms in Slavonia. In Osijek it has 900 subscribers: the Small box (4 kg) costs **€15.90** and the Family box (8 kg) **€27.90** a week, delivery included. In March 2027 Farm2Door enters **Zagreb**, where it has no customers yet and where GreenCrate already sells vegetable boxes. The owners must set the Zagreb prices and decide how to sell eggs and cheese from the same farms.

Zagreb households that buy organic vegetables (survey of 1,000 households, scaled) and extras

Segment	Households	What they buy	What they told us
Singles and couples	5,000	About 4 kg of vegetables a week	Share who would subscribe to a Small box: €11.90: 11% · €13.90: 10% · €15.90: 6% · €17.90: 3.5%.
Families with children	4,000	About 8 kg a week	Share who would subscribe to a Family box: €21.90: 14% · €23.90: 12% · €25.90: 9% · €27.90: 6%.
Subscribers who buy extras (Osijek data)	40% of subscribers	10 eggs and 400 g of cheese from the farms, weekly	Half of them would pay up to €4.50 for the eggs and €3.50 for the cheese; the other half up to €2.50 and €5.50.

Costs

- Vegetables from the farms: **€1.60 per kg**. Returnable crate and packing €0.60, payment €0.20 per box. Eggs cost €2.00 (10), cheese €2.50 (400 g).
- Delivery in Zagreb by e-van: **€3.50 per box** below 800 boxes a week; **€2.50** from 800 boxes a week (denser routes).
- Zagreb fixed costs (hub, two truck runs a week from Osijek, staff, marketing): **€180,000** a year. The truck carries up to 1,500 boxes a week.

Competitors

- **GreenCrate** (Zagreb): one 6 kg organic box, **€26.90** a week, 1,500 subscribers; buys from wholesalers at about €2.60 per kg.
- Supermarkets: organic vegetables at about €3.60 per kg; a farmers' market on Saturdays.

Constraints

- All farms are certified organic (EU organic logo). The vegetables travel 280 km from Slavonia to Zagreb.
- Marketing proposes to advertise in Zagreb as "local and climate-friendly". Green claims must be provable (EU rules).
- Prices in this case are final consumer prices – ignore VAT.

Read for this case: lecture handouts Part 03, Part 04, Part 07 and Part 10 (Loomen). **Your task** is described in the Project Brief.

Case 12 · B2C · green

Second Life Furniture – Marketplace for used furniture with transport and restoration

Fictitious company – all names and figures are invented for this course.

Second Life Furniture d.o.o. buys used solid-wood furniture in Istria and Kvarner, restores it in its Rijeka workshop and sells it through its web shop and warehouse showroom. Today every item has one price that includes restoration, delivery and assembly – on average **€399**. In 2026 it sold 1,606 items and made a loss. The owners want a new price list and a new web shop before the Christmas season.

Visitors who asked about an item in 2026 (web shop and showroom; survey of 700 of them)

Segment	Visitors a year	What they want	What they told us (typical item)
DIY restorers	1,200	Buy as-is, collect with their own van and restore the piece themselves. Today 8% buy.	Share who would buy as-is, collected: €229: 45% · €249: 40% · €279: 28%.
Car owners	1,000	Want the piece restored; can collect it themselves. Today 25% buy.	Share who would buy restored, collected: €324: 46% · €349: 40% · €379: 30%.
Full-service buyers	2,800	Want it restored, delivered and assembled. Today 45% buy.	Share who would buy at a total price of €369: 50% · €429: 42% · €459: 33%.

Costs per item

- Buying a typical item from its owner: **€120**. Restoration (materials; restorers are paid per piece): **€75**. Delivery and assembly in the Rijeka area (van, two people): **€45**.
- Fixed costs (warehouse, showroom, web shop, staff): **€280,000** a year.

Market prices

- A comparable new solid-wood dining table costs about **€1,100** in furniture stores; a new particle-board table about €280.
- Furniture stores charge €59–89 for delivery and assembly; independent restorers €150–250 per piece. On **Oglasko**, a classifieds site, private sellers offer similar tables as-is for €150–300, without any guarantee.

Web shop and marketing

- Today the web shop shows "Was €1,100 – now €399 (−64%)", using the new-furniture price as the "was" price.
- An oak table was listed at €420 from 1 October and raised to €480 on 10 November. For Black Friday (27 November) marketing plans "Was €480, now €336 (−30%)".
- Marketing also wants "Eco-friendly choice – saves 90 kg of CO_2" on every item; the figure comes from a foreign blog. Second Life has no study of its own.

Constraints

- Unsold items are marked down by 20% after 45 days in the web shop. Green claims must be provable (EU rules).
- Prices in this case are final consumer prices – ignore VAT.

Read for this case: lecture handouts Part 03, Part 04 and Part 05 (Loomen). **Your task** is described in the Project Brief.

Case 13 · B2B · digital

Sezonar – Shift planning for seasonal staff in hotels and restaurants

Fictitious company – all names and figures are invented for this course.

Sezonar d.o.o. from Poreč has built software for planning the shifts of staff in hotels, campsites and restaurants. Managers plan on the web; employees see their shifts, swap them and clock in on their phones. The app warns before overtime and exports worked hours to payroll in the Croatian format. After a free pilot with 40 businesses in the 2026 season, Sezonar will start charging in **January 2027** in Istria and Kvarner and needs a price list.

Businesses in Istria and Kvarner

Segment	Number	Employees with shifts	What they need
Large seasonal resorts and campsites	25	150 in June–September, 80 in April, May and October, 20 in November–March	Planning, shift swaps, time clock and payroll export; many new seasonal workers every year.
Small seasonal hotels	80	25 in June–September, 10 in April, May and October, 2 in November–March	The same as resorts; the owner plans the shifts.
Year-round city hotels	20	50 all year	Planning, time clock and payroll export; stable staff.
Seasonal restaurants and beach bars	400	12 in June–September, 6 in May and October; closed November–April	Planning and shift swaps on the phone. Owners cover gaps themselves; an accountant does the payroll for a flat fee.

What the pilot showed

- Planning in spreadsheets and messaging groups takes a manager about **20 minutes per employee a month**; with Sezonar **5 minutes**. A manager's time costs **€20 an hour**.
- In hotels, unplanned overtime fell by **0.4 hours per employee a month** (overtime costs €15 an hour), and the payroll export saves about **€3 per employee a month**. Restaurants and bars saw no change in either.
- Pilot businesses said they would sign if the yearly price were at most a quarter of their yearly saving (**80%**), at most half (**55%**) or at most three quarters (**20%**); none above that.

Costs of Sezonar

- Servers and text messages: **€0.30** per employee for each month in which the employee has shifts. Time-clock and payroll-export module: licence of **€0.60** per employee using it a month.
- Onboarding and support: €150 per hotel and €30 per restaurant a year. Fixed costs: **€150,000** a year.

Competitors and alternatives

- About 80% of the businesses plan in spreadsheets and messaging groups today.
- **Rostava** (international): **€5 per registered user a month**, 12-month contract; users cannot be removed during the contract. Planning, swaps and time clock; no Croatian payroll export.
- **Smjenko** (Croatian): **€190 per location a month**, 12-month contract; planning only, no employee app.

Constraints

- Many businesses are closed or nearly empty from November to March; seasonal staff are hired for 2–7 months.
- Prices in this case exclude VAT.

Read for this case: lecture handouts Part 03, Part 04 and Part 07 (Loomen). **Your task** is described in the Project Brief.

Case 14 · B2B · digital

LedgerLite – Bookkeeping and e-invoicing for micro-businesses

Fictitious company – all names and figures are invented for this course.

LedgerLite d.o.o. from Osijek sells a web and phone app in which micro-businesses issue and receive eRačun (e-invoices), keep simple books and send reports to their accountant. From **1 January 2027** businesses outside the VAT system must also issue eRačun. LedgerLite launches its paid service for them on **15 October 2026** and has to set its price for 2027 and the following years.

Businesses in Slavonia and Zagreb County (LedgerLite's estimate)

Segment	Number	How they work today	What they told us
Sole traders outside the VAT system (up to 10 invoices a month)	24,000	Receive eRačun in MIKROeRAČUN; keep records in a spreadsheet or on paper	Share who would choose LedgerLite before 1 January 2027 at a price a month (annual plan): €3: 22% · €5: 18% · €8: 9% · €12: 3%. If the first year were free: 40%.
Micro-businesses outside the VAT system (20–60 invoices a month)	8,000	The same, plus checking payments and sending reminders by hand	€3: 45% · €5: 40% · €8: 30% · €12: 14%. If the first year were free: 55%.
VAT-registered micro-firms	10,000	Obliged since 1 January 2026; 90% chose a paid tool in the last quarter of 2025	Since then only 4% a year have changed their tool.

E-invoicing rules (Tax Administration)

- Taxpayers registered for VAT and established in Croatia must issue and receive eRačun from **1 January 2026**.
- Taxpayers outside the VAT system must receive eRačun from 1 January 2026 and issue them from **1 January 2027**.
- The Tax Administration offers the free **MIKROeRAČUN** application; the Tax Administration acts as the access point.

Value and switching

- Pilot users who use MIKROeRAČUN and a spreadsheet spend **3 hours** a month on invoices, records and payment checks (sole traders) or **5 hours** (many invoices); with LedgerLite 2 and 3 hours. Owners value their time at **€10 an hour**.
- Accountants charge **€3 a month less** when the records come from LedgerLite. Moving invoices and customer data to another tool takes about 6 hours.
- Bank-statement import and automatic payment matching will be ready in **January 2028**; pilot users value them at about **€3 a month**.

Price response and costs

- Share of pilot users who would leave if the price rose after the first year by €2: 6% · €3: 10% · €5: 40% · €8: 70%. About 6% of users a year close their business or leave for other reasons.
- Variable cost: **€0.90** per customer a month (servers, invoice exchange, support). Fixed costs: **€300,000** a year.

Competitors

- **Kontira** (bookkeeping software for VAT-registered firms): **€15 a month**, 20,000 paying customers; no plan for businesses outside the VAT system so far.
- Prices in this case, including the survey prices, exclude VAT.

Read for this case: lecture handouts Part 03, Part 06, Part 07 and Part 10 (Loomen). **Your task** is described in the Project Brief.

Case 15 · B2B · digital

ShieldDesk – Round-the-clock cyber-security monitoring for small and medium-sized firms

Fictitious company – all names and figures are invented for this course.

ShieldDesk d.o.o. from Rijeka watches the computers, servers and cloud accounts of small and medium-sized firms around the clock. A small program on every device sends alerts to ShieldDesk's security centre, where analysts isolate an infected device and start recovery. After a pilot with 20 firms in 2026, ShieldDesk is preparing its price list for 2027. Its business plan assumes **5,000 devices**.

Target firms in Primorje-Gorski Kotar and Istria

Segment	Firms	Devices per firm	Facts and survey (share who would sign at a price per device a month)
Manufacturers	60	80	A day with systems down stops production: about **€20,000**. €5: 75% · €9: 60% · €12: 45% · €15: 25%.
Law, tax and accounting offices	120	30	A day down costs about **€6,000**; they hold confidential client data. €5: 70% · €9: 55% · €12: 40% · €15: 20%.
Retailers and web shops	80	40	A day down costs about **€8,000** in lost sales. €5: 70% · €9: 55% · €12: 40% · €15: 15%.

Incidents and their cost

- Insurers' data: a firm of this size has a **10%** chance a year of a serious incident, such as ransomware. **70%** of these incidents start in the evening, at night or at weekends.
- Found the next working day: about **5 days** with systems down and **€60,000** of recovery costs. Contained within 4 hours: **half a day** down and **€10,000**.
- In the pilot ShieldDesk contained **19 of 20** incidents within 4 hours; the one it missed cost the client €40,000 to recover. Insurers cut the cyber-insurance premium by **€900 a year** for firms with round-the-clock monitoring.

How firms buy

- The owner signs. The finance manager compares the price with the insurance premium; the IT manager asks about false alarms, night calls and whether the program slows computers down.
- Reasons given in 40 lost deals in 2026: "it will not happen to us" 45% · "we cannot check the promised response time" 35% · "too expensive" 20%. One in three of the firms that named the response time say they would have signed if ShieldDesk had guaranteed it in writing.

Costs

- Program licence **€1.20** and analysts' time **€1.80** per device a month.
- Fixed costs of the security centre: **€540,000** a year; it can serve up to 12,000 devices.

Competitors and other facts

- Local IT firms: monitoring in office hours for **€5 per device a month**. **Securalis** (international): round the clock, **€22 per device a month**, at least 100 devices. All firms already pay for antivirus.
- Prices in this case exclude VAT.

Read for this case: lecture handouts Part 03, Part 05 and Part 07 (Loomen). **Your task** is described in the Project Brief.

Case 16 · B2B · digital

RouteSense – Route optimisation for delivery fleets

Fictitious company – all names and figures are invented for this course.

RouteSense d.o.o. from Zagreb has developed software that plans the daily routes of delivery vans and trucks. It orders the stops, respects delivery windows, ferry timetables and loading limits, and sends each driver the route on the phone. In a 3-month pilot with 12 fleets in 2026 it cut the fuel used per delivery stop by 6–18%. RouteSense now has to set its prices for 2027.

Fleets in Croatia that RouteSense targets

Segment	Fleets × vehicles	Use and pilot result	Fleets that have not tried it: share who would sign at a price per vehicle a month
Food and drink distributors	40 × 25 vans	45,000 km a van a year; dispatchers plan in spreadsheets. Pilot: **18%** less fuel per stop.	€10: 60% · €20: 35% · €35: 15% · €50: 5%
Building-materials and furniture delivery	25 × 12 trucks	50,000 km a truck a year. Pilot: **12%** less.	€10: 65% · €20: 45% · €35: 25% · €50: 10%
Parcel couriers	10 × 80 vans	40,000 km a van a year; use the basic planner of their telematics provider. Pilot: **6%** less.	€10: 30% · €20: 10% · €35 or more: 0%
Small local fleets (bakeries, pharmacies, florists)	150 × 3 vans	25,000 km a van a year. Pilot: **8%** less.	€10: 20% · €20: 5% · €35 or more: 0%

Fuel and the pilot

- Vans use about **10 litres** of diesel per 100 km, trucks about **20 litres**. Diesel cost €1.35–1.55 a litre in 2026, **€1.40** on average.
- All fleets use fuel cards and telematics, so RouteSense can read the litres and the delivery stops of every vehicle.
- Before the pilot the fleets expected about a third of the saving they then achieved. Afterwards, 11 of the 12 would pay per vehicle a month up to a quarter of their measured saving, 9 up to a third and 3 up to half. Fleets that have not tried it say they would accept the same shares if the fee were paid only from a saving measured on their own fuel cards.

Costs of RouteSense

- Maps, traffic data and servers: **€3** per vehicle a month. Onboarding, baseline check, monthly saving report and support: **€40** per fleet a month.
- Fixed costs: **€300,000** a year.

Competitors and alternatives

- **Vantora** (international): **€35 per vehicle a month**, 12-month contract. In RouteSense's tests it saved about two thirds of what RouteSense saves (no ferry timetables, weaker Croatian address data).
- Telematics providers include a basic planner in their fee; most distributors plan in spreadsheets.

Other facts

- Contracts in this market run for 12 months. Fleet managers are judged on fuel cost per delivery; many owners doubt software suppliers' saving claims.
- Prices in this case exclude VAT.

Read for this case: lecture handouts Part 03, Part 04 and Part 05 (Loomen). **Your task** is described in the Project Brief.

Case 17 · B2B · digital

ClinicFlow – Online booking and appointment reminders for private clinics

Fictitious company – all names and figures are invented for this course.

ClinicFlow d.o.o. from Zagreb runs online booking and text-message reminders for **280 private clinics**. Patients book on the clinic's website or app and get a reminder the day before. All clients have the same list price, but sales reps negotiate discounts and free months, and some clinics call support far more often than others. After a loss in 2026, ClinicFlow wants a new price structure for all clients from **1 January 2027**.

ClinicFlow's clients

Clinic type	Clinics	Per clinic a month	Today: discount; free months a year	Share who would leave if their monthly bill rose to
Dental practices	140	1 location, 300 appointments, 2 support calls	5%; none	€100: 5% · €110: 30% · €130: 60%
Physiotherapy centres	60	1 location, 900 appointments, 3 calls	15%; 1	€150: 10% · €175: 25% · €200: 60%
Polyclinics	20	3 locations, 4,000 appointments, 10 calls	35%; 2	€450: 5% · €680: 20% · €780: 60%
Aesthetic and dermatology clinics	60	1 location, 250 appointments, 6 calls (help with marketing campaigns)	10%; 1	€120: 10% · €145: 20% · €170: 60%

Today's prices

- List price **€99 per clinic a month**, whatever the number of locations; reminders, phone support and onboarding included. Discounts and free months at renewal are agreed by the sales reps (table).
- Contracts can be changed with 60 days' notice.

Value to clinics

- Reminders cut no-shows from **12%** to **5%** of appointments. A filled slot is worth **€60** to a dental practice, **€25** to a physiotherapy centre, **€70** to a polyclinic and **€150** to an aesthetic clinic.
- Online booking saves reception staff about 2 minutes per appointment (staff cost: €12 an hour).

Costs of ClinicFlow

- Text message and servers: **€0.04** per appointment. A phone support call costs **€12** of staff time.
- Fixed costs: **€200,000** a year.

Competitors and switching

- **Kalendra** (international): **€0.30 per booked appointment**, reminders included, e-mail support only. **Rezervko** (Croatian): **€129 per location a month**, 1,000 text messages per location included, then €0.05 each; phone support.
- Moving to another system costs a clinic about **€800 per location** (staff training, new booking links for patients). Prices in this case exclude VAT.

Read for this case: lecture handouts Part 03, Part 04 and Part 06 (Loomen). **Your task** is described in the Project Brief.

Case 18 · B2B · digital

Klijentnik CRM – CRM for small marketing, design and PR agencies

Fictitious company – all names and figures are invented for this course.

Klijentnik d.o.o. from Split sells a CRM for marketing, design and PR agencies: client contacts, sales pipeline, proposals, time tracking on projects and export of invoices to Croatian accounting programs, with support in Croatian. It costs **€29 per user a month** (monthly billing) and is used by **1,260 agencies with 7,500 users**. In September 2026 the global CRM **PipeGlobe** launched a Croatian version at **€14 per user a month**.

Klijentnik's customers (survey, September 2026)

Agencies	Number (users)	How they use Klijentnik	Would move to PipeGlobe at €14
Small (1–5 users)	800 (2,400)	45% use only contacts and the pipeline; the others also use time tracking, proposals or the invoice export.	35% of the small agencies – all of them among those that use only contacts and the pipeline
Mid-size (6–15 users)	400 (3,600)	All use time tracking and proposals; most use the invoice export.	8%
Large (16–40 users)	60 (1,500)	Everything, plus links to other software and priority phone support.	3%

What agencies told us

- Of the agencies that would move, **75%** would stay if Klijentnik cost at most **€1 per user a month** more than PipeGlobe: they value support in Croatian and Croatian invoice formats.
- Agencies that use time tracking, proposals or the invoice export say they would not give them up for a lower price.

Costs

- Servers, licences and e-mail support: **€2** per user a month; phone support: **€1** per user a month.
- Fixed costs: **€1,900,000** a year.

PipeGlobe

- **€14 per user a month**, paid yearly: contacts, pipeline and e-mail integration; support by e-mail in English; no Croatian invoice export. Its Pro plan with time tracking and proposals costs **€32**.
- PipeGlobe is backed by large investors. After entering Poland and Portugal it cut its prices twice within a year.

Constraints

- Prices are published on the website; within one plan every customer pays the same price.
- Customers can cancel at the end of any month. Prices in this case exclude VAT.

Read for this case: lecture handouts Part 04, Part 07 and Part 08 (Loomen). **Your task** is described in the Project Brief.

Case 19 · B2B · green

Humus Coast – Food-waste collection and composting for hotels and restaurants

Fictitious company – all names and figures are invented for this course.

Humus Coast d.o.o. from Kaštela collects separated food waste from hotels and restaurants around Split and turns it into compost that it sells to farms. Its composting site can process **8,000 tonnes** a year. Today hotels and restaurants throw food waste into mixed waste, which the public utility collects for **€190 per tonne** in 2026; the utility has announced **€230 per tonne from 2027**. Each mixed-waste container also costs **€100 a month**. Hygiene rules: food waste must be picked up **daily from May to October and twice a week from November to April** – or, with a cooled bin, three times a week in season and once a week otherwise.

Customers around Split

Segment	Number	Food waste a year	Facts
Large hotels	20	180 t each	Can return one mixed-waste container after separating food waste. Separation costs them about €2,000 a year in staff time. Their sustainability managers need a monthly waste and CO_2 report for eco-labels, which today costs them about €1,500 a year of staff time.
Mid-size hotels	35	50 t each	Can return one mixed-waste container. Separation costs about €1,000 a year in staff time.
Restaurants	60 (40 in old towns)	8 t each	Cannot return a container. Separation costs about €300 a year. In the old towns of Split and Trogir up to 5 neighbouring restaurants can share one collection point.

What customers told us

- In a pilot, **70% of hotels** signed when their total yearly waste cost, including their own staff time, fell by **at least 15%**.
- Half of the old-town restaurants would join if it costs **no more than today**; a third would pay up to €20 a month more for a "We recycle our food waste" sticker.
- A hotel chain that owns **6 of the large hotels** asks for **15% off** any price, for all its hotels.

Costs of Humus Coast

- Each pickup at one collection point (shared or not): **€22**. Composting: **€25 per tonne** after compost sales.
- Bins, washing and fill sensor: €50 a month per collection point; a cooled bin costs €40 a month more. Fixed costs: **€250,000** a year.

Competitors

- The public utility (prices above).
- **EcoPick** from Zagreb takes food waste to a biogas plant: **€150 per tonne**, one pickup a week, no reports.

Constraints

- Green claims must be provable (EU rules). Humus Coast can weigh every pickup and calculate CO_2 with a certified method, but it cannot claim to be "climate neutral".
- Prices in this case exclude VAT.

Read for this case: lecture handouts Part 03, Part 04, Part 05 and Part 06 (Loomen). **Your task** is described in the Project Brief.

Case 20 · B2B · green

PalletLoop – Pooled reusable pallets for food producers

Fictitious company – all names and figures are invented for this course.

PalletLoop d.o.o. from Osijek runs a pool of **40,000 reusable pallets** for food producers in eastern Croatia. A producer loads its goods on a PalletLoop pallet and sends them to a distribution centre (DC) of a retail chain. PalletLoop collects the empty pallets from the **14 DCs** of the four national chains (the network), checks and repairs them and brings them back to the producers. After a free pilot with **23 producers** in 2026, PalletLoop needs a price list for 2027.

Producers in the pilot (a load = one pallet sent)

Group	Producers	Loads a year	Facts and what they told us
Fresh food (dairy, meat, bakery)	8	220,000	Pallets are back at a DC after **12 days** on average; 1% of loads go to shops outside the network. Share of their network loads they would move to PalletLoop, by price per load: €6.00: 90% · €6.50: 80% · €7.00: 50% · €7.50: 20%.
Long-storage food (canned vegetables, jams, flour)	10	120,000	Goods wait on the pallet in their own warehouse, so pallets are back after **70 days**; 2% of loads go outside the network. Share by price per load: €6.00: 85% · €6.50: 75% · €7.00: 45% · €7.50: 15%.
Exporters (frozen fruit and vegetables)	5	100,000	Pallets are back after **25 days**. **20%** of their loads go to buyers abroad, outside the network, where nobody collects pallets. For network loads, the same shares as fresh food.

Value to producers

- One-way pallets break under **1.5%** of loads, PalletLoop pallets under **0.3%**. A damaged load costs the producer **€100** on average.
- Ordering pooled pallets two days ahead and scanning every load costs producers about **€0.20** per load in staff time.

Costs of PalletLoop

- Each load costs **€3.40**: collection at the DC, sorting, repair, cleaning, delivery to the producer, and pallets lost inside the network. A new pallet costs **€20**.
- Fixed costs (depot, pallet pool, tracking system, staff): **€850,000** a year.

Competitors and alternatives

- Today all 23 producers use **one-way wooden pallets**: **€5.40** each, used once. The retail chains charge **€0.60** for disposing of each one-way pallet.
- **PoolTrax**, an international pooler, serves producers around Zagreb, not yet in eastern Croatia: **€3.80** per pallet issued + **€0.05** per pallet per day; **€30** for each pallet not returned.

Constraints

- An independent life-cycle study (2026): one load on a PalletLoop pallet causes **2.1 kg CO_2e**, one on a one-way pallet **6.8 kg**. PalletLoop has no other environmental evidence. Green claims must be provable (EU rules).
- Prices in this case exclude VAT.

Read for this case: lecture handouts Part 03, Part 04 and Part 07 (Loomen). **Your task** is described in the Project Brief.

Case 21 · B2B · green

CargoVolt – Delivery by electric cargo bikes for shops in the city centre

Fictitious company – all names and figures are invented for this course.

CargoVolt d.o.o. delivers goods by electric cargo bike in the centre of Zagreb. Suppliers leave goods at its hub at the edge of the pedestrian zone; riders take them to shops, cafés and restaurants, and deliver shops' sales to customers' homes. CargoVolt has **10 bikes**; each makes **4 drops an hour** (a drop = one delivery to one address, up to 120 kg), from 7:00 to 19:00, **25 days a month**. After a test year at a flat **€6.00 per drop**, CargoVolt sets its prices for 2027.

Customers in the centre

Segment	Number	Drops a month	Facts and what they told us
Cafés and restaurants	80	3,600 (45 each)	Supplies must arrive **7:00–10:00**, before service. Share of their drops they would give CargoVolt, by price per drop: €6.00: 90% · €7.00: 75% · €8.00: 45% · €9.00: 20%.
Independent shops (sales delivered to customers' homes)	150	2,400 (16 each)	70% must arrive **16:00–19:00**, when customers are at home; 30% can arrive any time 10:00–19:00. Share by price per drop: €6.00: 90% · €7.00: 80% · €8.00: 55% · €9.00: 30%.
Chain stores and pharmacies (restocking)	16	4,800 (300 each)	Own vans cost them about **€4.50** per drop. Each store would give CargoVolt its **100 most urgent** drops a month at up to €6.00, the other 200 at up to €4.50. Goods may arrive 7:00–16:00; at equal prices they prefer before 10:00.

Service and competitors

- CargoVolt delivers within a **1-hour slot** chosen by the customer.
- **Van couriers** charge **€6.00** per drop and deliver within a 4-hour window (morning or afternoon); their vans often block the narrow streets while unloading.

Costs of CargoVolt

- Variable cost per drop: **€2.40** (rider's pay per drop, charging, tyres, repairs).
- Fixed costs (riders' base pay, bike leasing, hub, dispatcher, insurance, app): **€26,000** a month.

Constraints

- The bikes charge from the grid on a normal tariff. A certified calculation: **0.03 kg CO_2e** per drop by cargo bike, **0.60 kg** by diesel van. Green claims must be provable (EU rules).
- Prices in this case exclude VAT.

Read for this case: lecture handouts Part 04, Part 07 and Part 11 (Loomen). **Your task** is described in the Project Brief.

Case 22 · B2B · green

RoofGreen – Green roofs for commercial buildings (installation and maintenance)

Fictitious company – all names and figures are invented for this course.

RoofGreen d.o.o. from Zagreb installs and maintains green roofs on the flat roofs of commercial buildings. Its system replaces the old roof: a new root-proof membrane, drainage, at least **8 cm** of substrate and plants. Many roofs built around 2005 need a new membrane now. From 2027 the water utility charges a **stormwater fee of €2.00 per m²** of roof a year; roofs with its green-roof certificate pay only **30%** of the fee. RoofGreen is setting its prices for 2027.

Roofs that need a new membrane in 2027 (Zagreb region)

Segment	Roofs	m² each	Facts and what owners told us
Logistics warehouses	12	6,000	Light roofs: only a thin (extensive) green roof. Not cooled. Owners sign if the payback of the extra cost over a new membrane is at most: 4 years: 70% · 6 years: 55% · 8 years: 30% · 10 years: 10%.
Retail parks	5	8,000	Extensive roofs only. Shops under the roof are cooled: a green roof saves about **€0.20** per m² of roof a year. Same payback rule as warehouses.
Office buildings (landlords)	15	1,000	Roof garden with a terrace possible. 5 rented floors of 1,000 m², **€15 per m²** a month; tenants pay **2%** more rent with a usable roof garden. Cooling saves about €0.50 per m² a year. Payback rule: 4 years: 60% · 6: 45% · 8: 20%.

Value facts

- A new bitumen membrane costs **€70 per m²** and lasts **20 years** in the sun; under a certified green roof its maker guarantees **40 years**.
- Certified roofs must be maintained twice a year by a certified firm: market price **€0.90** per m² a year (extensive) and **€2.40** (roof garden).
- Owners compare roof options over 20 years, without discounting. Finance directors, who approve the budget, count only the savings they see on a bill (the stormwater fee).

Costs of RoofGreen

- Installed extensive roof, membrane included: **€66 per m²**; roof garden with paths, railings and irrigation: **€130 per m²**.
- Maintenance costs RoofGreen €0.50 (extensive) and €1.50 (garden) per m² a year. Fixed costs (design, sales, crews, equipment): **€1,150,000** a year.

Competitors

- Roofers: a new membrane only, €70 per m².
- **SedumFix** lays thin sedum mats (4 cm) on a new membrane for **€78 per m²**. Its roofs do not get the certificate; it offers no maintenance.

Constraints

- The utility's certificate states that RoofGreen roofs hold back **60%** of the yearly rain. Green claims must be provable (EU rules).
- Prices in this case exclude VAT.

Read for this case: lecture handouts Part 03, Part 05 and Part 07 (Loomen). **Your task** is described in the Project Brief.

Case 23 · B2B · green

ReKrug IT – Refurbished laptops as a service, per user per month

Fictitious company – all names and figures are invented for this course.

ReKrug IT d.o.o. from Zagreb buys three-year-old business laptops returned from large companies' leases, refurbishes them (new battery, SSD check, certified data wipe, clean installation) and rents them to organisations **per user per month** on **24-month contracts**, repairs included. Since 2025, **60 pilot customers** (900 users, all small offices) have paid **€22** per user per month for a laptop with a **24-hour swap** (a replacement laptop the next working day); their contracts end in 2027. ReKrug IT is now setting its price list.

Organisations in its market (one user = one laptop)

Segment	Organisations	Users	Facts and what they told us
Small professional offices (accounting, law, architects)	300	3,000	No IT staff. A user without a laptop loses about **€160** of billable work a day. Share who would sign, with a 24-hour swap: €23: 75% · €27: 60% · €31: 30%. Those who do not would take a 5-day repair: €17: 50% · €19: 40% · €21: 20%.
NGOs, schools and training centres	150	2,000	Keep a few spare laptops; a lost day costs them about €40. None would pay for a 24-hour swap. With a 5-day repair: €17: 75% · €19: 60% · €21: 35% · €23: 15%.
Medium firms with an IT department	40	4,000	IT staff keep spare laptops and give first-line support. Their large customers ask them for CO_2 data per laptop. With a 5-day repair: €17: 60% · €19: 50% · €21: 30% · €23: 10%.

Service facts

- **12%** of laptops need a repair each year. A repair by courier takes **5 working days**.
- Pilot customers: 85% would renew with the 24-hour swap at €27, 50% at €31.

Costs of ReKrug IT

- Laptop **€240** + refurbishment **€80**, and a new battery (**€40**) after 24 months. A laptop serves two contracts (48 months); then a licensed firm recycles it.
- Service per user per month: **€2.50** with a 5-day repair, **€5.00** with a 24-hour swap (spare laptops, courier). Fixed costs: **€560,000** a year.

Competitors

- **Kvant Leasing** (bank leasing): a new business laptop for **€38** per user per month, 36 months, next-working-day repair on site.
- **Relapto**: refurbished laptops for **€20** per user per month, 5-day repair, monthly contract, the first 6 months at half price. It reports that 30% of its customers cancel when the full price starts.

Constraints

- Independent study (2026): making and shipping a new business laptop, used for 48 months, causes **300 kg CO_2e**; refurbishing a used one **30 kg**. Green claims must be provable (EU rules).
- Prices in this case exclude VAT.

Read for this case: lecture handouts Part 04, Part 06, Part 07 and Part 11 (Loomen). **Your task** is described in the Project Brief.

Case 24 · B2B · green

AgriSense – Soil-moisture sensors and irrigation advice for vineyards

Fictitious company – all names and figures are invented for this course.

AgriSense d.o.o. from Zadar has developed soil-moisture probes for vineyards: each probe measures water at three depths and sends the data by radio. An app, checked every week by an AgriSense agronomist, tells the vineyard manager when and how much to irrigate each block. After two seasons of trials on its own blocks, AgriSense launches in the **2027 season** in Croatian vineyards with drip irrigation. It must set its prices for 2027 and 2028.

Vineyards with drip irrigation

Segment	Number	Irrigated ha	Facts and what they told us
Large wineries (premium wines, export)	15	1,800	Vineyard managers want advice, not raw data. Share that would sign for all irrigated ha in 2027, by price per ha a season (advice included): €80: 40% · €110: 30% · €140: 25% · €170: 10%.
Family wineries (10–50 ha)	120	2,400	In 2027 only 5% would try (at up to €110 per ha); the rest wait for results from wineries they know. From 2028, with advice: €80: 25% · €110: 15% · €140: 10%; alerts only: €40: 50% · €60: 35% · €80: 15%.
Small grape growers (sell to cooperatives by the kilo)	900	1,200	Would pay at most **€20** per ha a season, probes included. Their cooperative may pay for its members from 2029.

Value per irrigated ha and season

- Vineyards use about **1,500 m³** of water per ha a season at **€0.30** per m³ (water fee and pumping). In the trials the advice cut water use by **30%**.
- Better-timed irrigation raised the share of premium-grade grapes, worth about **€250** per ha to large wineries and **€120** to family wineries. Fewer field checks save **5 hours** per ha at €12 an hour.

What large wineries told us

- With a free pilot on one block and money back if the season's water saving is below 20%, the shares would be: €80: 75% · €110: 70% · €140: 60% · €170: 35%.
- In the trials, 1 block in 10 saved less than 20% of water.

Costs of AgriSense

- Probe with installation: **€120**; one per 5 ha; it lasts five seasons. Data and app: **€6** per ha a season. An agronomist (€45,000 a year) can advise **1,500 ha**.
- A pilot block costs **€1,200** per winery. Fixed costs: **€120,000** a year.

Competitors and constraints

- Today most vineyards irrigate by experience and a spade test. **Humidix** (foreign) sells probes at **€900** each with a free app that shows raw data, without advice.
- Water-saving claims must be measured (EU rules on green claims). Prices in this case exclude VAT.

Read for this case: lecture handouts Part 03, Part 04, Part 07 and Part 10 (Loomen). **Your task** is described in the Project Brief.

Case 25 · supplier or distributor in the chain · green

VoltPoint Distribution – Home chargers for electric cars, sold through installers

Fictitious company – all names and figures are invented for this course.

VoltPoint Distribution d.o.o. from Zagreb is the only importer of **Ladewerk** smart home chargers (11 kW wallbox, made in Germany) for Croatia. It sells only to **installers** (licensed electricians), who sell and install the charger for households and small firms: Ladewerk → VoltPoint → installer → end customer. In 2026 VoltPoint sells **2,400 units**. It pays Ladewerk €400 per unit plus €15 for freight and customs. VoltPoint recommends a consumer price of **€949 including 25% VAT**; installation is charged separately (€250–400).

Installers who buy from VoltPoint (2026)

Group	Firms	Units	Facts
Large specialists (120+ units a year)	5	700	Use the training, stock, hotline and subsidy paperwork.
Other specialists	20	740	Use the same services.
Occasional installers	155	960	1–5 units a year each. 30% of the chargers they install are grey imports (below).

Services and costs of VoltPoint

- Stock in Zagreb and Split with next-day delivery (€18 per unit); 2-day certification training; technical hotline and 48-hour warranty swap (€22 per unit together); paperwork for the national subsidy, which only certified installers can file, and only for units bought in Croatia.
- A prepaid online order with courier delivery (€12 per unit) and e-mail support with the same local 48-hour warranty swap (€13 per unit together) would cost €25 per unit instead of €40. Fixed costs: **€210,000** a year.

Today's prices to installers

- List price **€600** net of VAT, 60 days to pay. Specialists get discounts negotiated case by case – **11.7% on average**.
- A sample of 8 specialists (units a year, discount): 260, 12% · 190, 18% · 150, 8% · 120, 15% · 60, 16% · 45, 6% · 30, 10% · 20, 13%.

Competition

- **Grey import:** a German online wholesaler sells the same charger to Croatian installers at **€560 net**; warranty through Germany (3–4 weeks), no subsidy paperwork. Occasional installers say they would come back if the gap to the grey price were **below €25** and the warranty swap were local – about 70% of their grey units.
- A Chinese wallbox sells in a DIY chain for €549 including VAT; no app, no load balancing.

Requests

- Ladewerk asks VoltPoint to "make sure that installers do not sell below €949".
- Ladewerk offers VoltPoint a **3% rebate** on all 2027 purchases if VoltPoint buys **25% more** units than in 2026.

Read for this case: lecture handouts Part 06, Part 08, Part 09 and Part 11 (Loomen). **Your task** is described in the Project Brief.

Case 26 · supplier or distributor in the chain · green

ReTile – Playground safety tiles from recycled rubber, exported through partners

Fictitious company – all names and figures are invented for this course.

ReTile d.o.o. from Čakovec makes interlocking safety tiles for playgrounds from recycled truck-tyre rubber, certified for fall heights up to 2 m. It exports **32,000 m²** a year: to Switzerland through an exclusive distributor, and to the UK through a distributor and three playground-equipment makers. Every partner pays the same euro price, **€38 per m²** delivered, set as full cost plus a mark-up. For 2027 ReTile has to set its export prices – currency and level – and its partners' terms.

Partners and what they told us (2026; prices per m² of tiles to councils and builders)

Partner	m² a year	What the partner does	What it told us
Kronwald Spielplatz AG, Switzerland (exclusive until 2028)	12,000	Stock in Zurich, council tenders, installation, on-site fall test	Sells at CHF 58. Wins about the same share of tenders at any price up to **CHF 64**; above CHF 64 it would lose about a third of them.
Brackenfield Surfaces Ltd, UK distributor	14,000	The same services as Kronwald	Sells at £46 and changes its price by the same percentage as its purchase price. Same share of tenders up to **£48**; above £48 it would lose about 30%.
Three UK playground-equipment makers	6,000	Add tiles to their playground contracts; ReTile delivers to the site. No stock, tenders or tests	Would keep buying ReTile up to **£42**; above that they would take Hollenberg's tiles. Brackenfield complains that they pay the same price as it does.

Value to councils and builders

- Interlocking tiles need no glue: installation costs **CHF 5 / £5 per m²** less than with Hollenberg's tiles.
- 10-year warranty (Hollenberg: 5 years), worth about **CHF 3 / £3 per m²** to buyers. Only 3 colours (Hollenberg: 8): in tender scoring councils count this as about **CHF 2 / £2 per m²** less.

Costs

- Production **€15.60 per m²**; freight €2.20 per m² to Switzerland and €3.00 to the UK (with customs documents). Fixed costs of the export business: **€450,000** a year.
- The two distributors' services cost them about **25%** of their selling price. Both say that below a **28%** margin on ReTile they would offer Hollenberg first and sell about a third less ReTile.

Competitor

- **Hollenberg Elastik GmbH** (Germany, costs in euros) sells tiles to councils at **CHF 60** and **£44** per m²; its distributors keep 30% of these prices.
- Hollenberg sells to UK equipment makers at **£38** per m² delivered to the site.

Currencies and constraints

- ECB reference rates of 21 September 2026: 1 EUR = **0.9438 CHF**; 1 EUR = **0.85780 GBP**. Scenario for 2027: the pound falls by 8% (1 EUR = 0.9324 GBP); the franc does not change.
- Councils buy through tenders with prices fixed in local currency for 12 months. All prices in this case exclude VAT (exports from Croatia are free of Croatian VAT; partners handle import VAT).

Read for this case: lecture handouts Part 03, Part 07, Part 09 and Part 10 (Loomen). **Your task** is described in the Project Brief.

Case 27 · supplier or distributor in the chain · green

Gazište Tyres – Retreaded truck tyres, sold to fleets through tyre-service shops

Fictitious company – all names and figures are invented for this course.

Gazište d.o.o. from Sesvete retreads truck tyres: it puts a new tread on a worn tyre casing, and the tyre runs again for a fraction of the price of a new one. It sells **13,600 tyres** a year through 20 independent tyre-service shops, which fit them for haulage fleets. Retreads are a mature product: fleets know them well, and cheap imported new tyres keep coming. Gazište has to set its prices for 2027, and its largest customers want to buy in a different way.

Fleets that run Gazište tyres (2026)

Fleets	Trucks	km a year per truck	What they do and what they told us
Large hauliers (4 fleets)	420	150,000	Run Gazište retreads on all positions (6,000 tyres a year) and use the free monthly check. They budget tyres per 1,000 km and would sign a 3-year contract for tyres, fitting and checks if it costs at least **5% less** than today.
Mid-size fleets (30)	450	110,000	Buy per tyre (5,500 tyres a year) and have the pressure checked about every 3 months. They do not sign multi-year contracts.
Small fleets and owner-drivers (about 200)	350	90,000	Never use the check. 40% of their tyres are imported budget tyres; the rest are Gazište's (2,100 a year). They would take a retread instead if a fitted retread cost no more than an import – about three quarters of those positions.

Tyre facts

- A truck with trailer runs **10 tyres** that can be retreads. A Gazište retread runs **105,000 km** if its pressure is checked every month, **90,000 km** otherwise.
- Each large fleet pays a tyre manager **€30,000** a year; the managers' work is included in the large fleets' 5% comparison. Mileage can be read from every truck's odometer each month.
- Casings of tyres run at the right pressure can be retreaded again. Gazište buys casings at **€40**; collecting and inspecting its own costs **€15**.

Prices and costs

- Gazište sells to shops at **€180** per tyre; shops sell at **€225** fitted, including the free monthly check that Gazište promises in its advertising. Shops set their own prices. All prices exclude VAT.
- Gazište: **€128** per tyre (casing €40; tread, energy and labour €88); fixed costs **€560,000** a year; managing contracts per km would add **€60,000** a year. Shops: a fitting costs them **€18** per tyre, a check **€2.50** per tyre.

Competitors

- Imported budget tyres: **€215** fitted, about 85,000 km; their casings cannot be retreaded.
- **Brennmark** premium new tyres: **€470** fitted, 160,000 km, casing sold for €40. For large fleets Brennmark offers new tyres with services at **€2.95 per 1,000 km** per tyre position.

Read for this case: lecture handouts Part 03, Part 04, Part 09 and Part 10 (Loomen). **Your task** is described in the Project Brief.

Case 28 · supplier or distributor in the chain · digital

TableTap – White-label ordering app for restaurants, sold through resellers of cash-register systems

Fictitious company – all names and figures are invented for this course.

TableTap d.o.o. from Zagreb sells a white-label ordering app for restaurants: guests scan a QR code at the table, order and pay in an app that carries the restaurant's own brand, and orders go straight into the cash register. It costs **€89 per restaurant a month**. **600 restaurants** use it: 380 signed through resellers of cash-register systems, 220 directly in TableTap's web shop. The resellers are unhappy, and a restaurant chain wants a big discount. TableTap has to set its channel terms for 2027.

Channels and customers (2026)

Channel or customer	Restaurants	How it works	What they told us
10 resellers of cash-register systems	380	The reseller shows the app, connects it to the cash register, trains the staff and gives first-line support. It buys at **€89 less 20%** and invoices the restaurant.	Of 500 demos in 2026, 150 restaurants signed with the reseller and 70 in the web shop within 60 days. Demos planned for 2027: 300 at today's terms, about 500 at a 30% margin alone, about 800 at MenuMesh's terms.
Web shop	220	Restaurants sign up online and set the app up themselves; the first **3 months are free**.	130 restaurants a year find TableTap on their own and sign up. In a test in spring 2026, as many signed up with 30 free days as with 3 free months.
Tanjurić, a chain of bistros	36 (not yet a customer)	Central IT department; has tested the app in 3 restaurants.	Asks for **35% off** for all 36 restaurants, month to month. MenuMesh offered it **€65** per restaurant a month. Its finance director prefers annual invoices and 3-year IT contracts.

Value to restaurants

- Orders go straight into the cash register: restaurants save about **€20 a month** of staff time compared with MenuMesh, which connects to only 2 of the 10 cash-register systems (none of them used by Tanjurić).
- In a survey restaurants valued their own brand in the app, instead of MenuMesh's, at about **€10 a month**.

Costs

- TableTap: servers, payment gateway and second-line support **€12 per restaurant a month**; fixed costs **€700,000** a year.
- Resellers: a demo costs them **€60**, installation and training **€240** per new restaurant, first-line support **€5** per restaurant a month. A restaurant stays about 36 months on average.

Competitor and constraints

- **MenuMesh** (international): **€79 per restaurant a month**, its own brand in the app. It gives resellers **30%** and credits a reseller for any restaurant it registered after a demo in the last 90 days, whichever channel the restaurant signs in.
- Restaurants pay month to month; reseller terms can change with 3 months' notice. Prices exclude VAT (25% is added; restaurants reclaim it).

Case 29 · supplier or distributor in the chain · digital

Adria Lens – Licences for photos of Croatia, sold to publishers, portals and agencies

Fictitious company – all names and figures are invented for this course.

Adria Lens d.o.o. from Split licenses photos of Croatia and the Adriatic – towns, food, nature, sport – taken by 45 photographers. Buyers download a photo from its website together with a licence to use it. Today every licence costs **€40 per photo, for any use**, from a blog post to a billboard. Revenue is €96,000 a year and the firm makes a loss. Adria Lens has to set a new price structure for 2027.

Buyers and what they told us (survey, 2026)

Buyers	Number	Use	Photos a year each that they would license from Adria Lens, by price per photo
Occasional buyers (small firms, blogs, NGOs)	400	A few photos for their websites and social media	€40: 1 · €12: 4 · €8 or less: 5
Web portals and news sites	60	Web articles; today most of their images come from Stockvera	€40: 5 · €12: 60 · €8: 150 · €6 or less: 170
Print publishers (magazines, books)	40	Photos printed in magazines and books	€40: 35 · €36: 40 · €24: 50 · €18 or less: 55
Advertising agencies and tourism boards	25	Campaigns: billboards, advertisements, brochures	€40: 12 · €250: 12 · €300: 10 · €400: 5

Value facts

- Web: an article with a photo of the actual place brings a portal about **€6** more advertising revenue than one with a generic image.
- Campaigns: a commissioned photographer costs about **€300** per usable photo and takes 2–3 weeks. Agencies value exclusive rights, which Adria Lens does not give, at about **€40** per photo.

Costs

- Photographers receive **40%** of revenue; card and platform fees are **2%**. Licence record, delivery and checks of use cost **€0.50** per licence.
- Fixed costs (staff, platform, image search, marketing): **€100,000** a year.

Competitors and constraints

- **Stockvera** (international): a yearly plan at about **€3 per image** for web and print use; advertising needs an extended licence at **€80**. It has fewer than 2,000 photos of Croatian places (Adria Lens: 120,000).
- A licence can name its use (web, print or advertising). Adria Lens's image search finds its photos on websites and in e-papers; in 2026 about 3% were used beyond their licence.
- All buyers are businesses. Prices exclude VAT.

Case 30 · supplier or distributor in the chain · digital

GameKey Balkan – Activation keys for PC games, sold to shops and web shops in five countries

Fictitious company – all names and figures are invented for this course.

GameKey Balkan d.o.o. from Zagreb is the authorised distributor of PC games from three mid-size publishers for Croatia and four non-EU neighbours: Serbia, Bosnia and Herzegovina, Montenegro and North Macedonia. It sells activation keys – codes that unlock a game on the publisher's download platform – to 30 electronics shops, which sell them as cards, and to 15 web shops. In March 2027 its biggest title, **Ashen Tide II**, comes out. GameKey has to plan the game's prices for its first two years in both regions.

Expected buyers of Ashen Tide II in its first two years (highest consumer price they would pay, incl. VAT)

Players	Croatia (EU)	Four non-EU countries	How they buy
Fans of the series	3,000 · up to €60	4,000 · up to €40	Want to play at release with their friends; buy in the first month if the price is within their limit
Regular players	6,000 · up to €45	8,000 · up to €30	Buy as soon as the price is within their limit, usually in the first year
Casual players	8,000 · up to €30	10,000 · up to €20	Buy as soon as the price is within their limit, usually in the second year
Bargain hunters	12,000 · up to €20	16,000 · up to €12	Buy only in sales, often 18 months or more after release

Channel and costs

- Shops and web shops keep **15%** of the consumer price net of VAT. GameKey buys each key from the publisher at **80%** of its own price to shops and pays **€0.30** per key for delivery, payment and fraud checks.
- GameKey pays the launch campaign in its region: **€40,000**. The publisher lets GameKey set its prices to shops and the consumer prices it suggests; shops set their own prices.

Market and grey trade

- Comparable new PC games sell at **€59.99–69.99** at release in Croatia; the publisher's release price in Germany and Austria is **€69.99**.
- In 2025 another distributor sold keys of a similar game in Serbia, without any lock, about **35%** below Croatian prices. Web shops resold them, and about **40%** of that game's Croatian sales went through such keys.

Constraints

- The publisher's platform can lock a key so that it activates only in chosen countries.
- Croatian web shops also sell to buyers in Slovenia, Austria and Germany. VAT: Croatia 25%; the non-EU countries 17–21% (use 20%). GameKey's prices to shops exclude VAT.
